

Edpuzzle Integration

Blackboard Learn

Faculty Support
eLearning

Edpuzzle is a web-based tool that instructors can use to create video lessons that integrate with Blackboard's Grade Center. Edpuzzle allows you to insert questions and annotations over a video to engage students in active learning. Faculty may log into the *free version* of Edpuzzle with their MATC Gmail accounts to create up to 20 free video lessons using Edpuzzle's library of educational videos.

Getting Started

- Go to [Edpuzzle.com](https://edpuzzle.com) and log in with your MATC Gmail account.
- See [Getting Started for Teachers](#) to learn how to get started with creating video lessons.

First Time Guide to Adding an Edpuzzle Lesson to a Course in Blackboard

Follow these instructions once you have set up your account and have created at least one video lesson.

1. When logged into Blackboard, access your course. Within a content area or folder, go to the **BUILD** menu and select **EDPUZZLE**.
2. On the form that appears, give the lesson a meaningful name and description. Scroll down to the **GRADING** section; here, enable evaluation and assign a point value for the lesson. Then, click Submit at the bottom of the page.
3. A link will post to the page in Blackboard. Now, click the link and the launch button that appears.
4. If you see an Edpuzzle login screen, log in with your MATC Gmail account. Once logged in, you should see your Edpuzzle's My Content page. Click on a video to select it.
5. In the video preview window that appears, click the **ASSIGN** button to display your video lesson settings. Click the **TURN ON CC** button. If desired, you may click the **PREVENT SKIPPING** button. Then, click **ASSIGN** again.
6. The link in Blackboard will now connect directly to the chosen video lesson. All video lessons posted to the Blackboard course will automatically be organized in a related course folder at Edpuzzle.
 - a. When students click an Edpuzzle link in the Blackboard course, they will be able to complete the video lesson. Once a student is scored on the video lesson, the score will post to a column in the course's Grade Center.
 - b. When you, the instructor, click on the Edpuzzle link in Blackboard, you will see a screen with tools for monitoring and grading students. If you adjust Edpuzzle lesson scores, click the **EXPORT GRADES TO LMS** link to sync the scores to your Blackboard Grade Center.

Support Resources

Contact support@edpuzzle.com directly for assistance with Edpuzzle. Training materials and resource guides are available at the [Edpuzzle Help Center](#).
