

# Making Web Links

Blackboard Learn

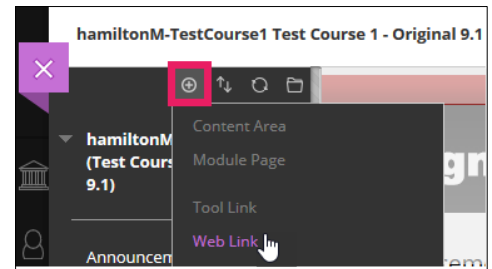

Faculty Support  
eLearning

Instructors can add a link to a website in their courses as a part of their course menu or as a link in a content area. These instructions assume that you have **EDIT MODE** turned on in your course.

Before you begin creating a link, we recommend copying the URL of the website that you want to link to directly from your browser's address bar or from the sharable link options the web resource provides. This is to avoid typos and helps ensure that the link will work!

## ADD A WEB LINK TO YOUR COURSE MENU

1. Above your course's menu, roll your mouse over the  **ADD** button and select **WEB LINK** from the menu that appears.

2. In the Web Link form that appears, give the link a logical name. Then, paste the URL web address you copied earlier into the URL field. To make the link available to students, be sure to check the **AVAILABLE TO USERS** checkbox. Click **SUBMIT** when done.

A screenshot of the "Add Web Link" form. It has two fields: "Name" with the value "Podcasts" and "URL" with the value "http://www.microbe.tv/twiv/". Below the URL field, there is a note: "For example, http://www.myschool.edu/". There is a checked checkbox for "Available to Users" and "Cancel" and "Submit" buttons at the bottom right.

3. The web link will be added to your course's menu. When the student clicks the link, the link will open in a new browser window.

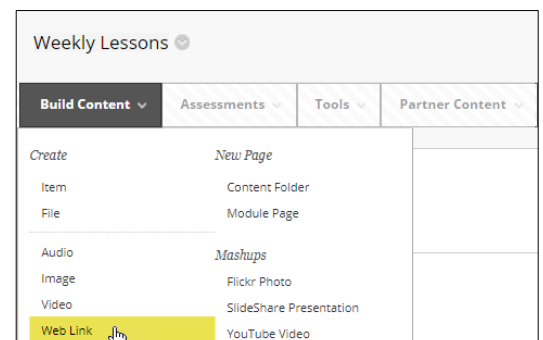

## ADD A WEB LINK TO A CONTENT AREA

You may add a link to a content area by either using the Web Link tool or when creating content that uses the content-editor tools.

### Using the Web Link Tool

1. In your **CONTENT AREA**, roll your mouse over the **BUILD CONTENT** button. In the menu that appears, click **WEB LINK**.

- The **CREATE WEB LINK** page will appear. In the **WEB LINK INFORMATION** section of the form, give the link a **NAME**.

In the **URL** field, **PASTE THE ADDRESS** of the site. Please make sure that there are no spaces added at the end of the address.

Create Web Link  
A Web Link is a shortcut to a Web resource. Add a Web Link to a Content Area to provide a quick access

\* Indicates a required field.

**WEB LINK INFORMATION**

\* Name: Podcasts

\* URL: http://www.microbe.tv/twiv/  
For example, http://www.myschool.edu/

This link is to a Tool Provider. [What's a Tool Provider?](#)

- Scroll down to **DESCRIPTION**. Here, you may add a description or instructions for students to follow when viewing the site.

**DESCRIPTION**

Text  
For the toolbar, press ALT+F10 (PC) or ALT+FN+F10 (Mac).

View the latest weekly podcasts to enrich your learning on virology topics.

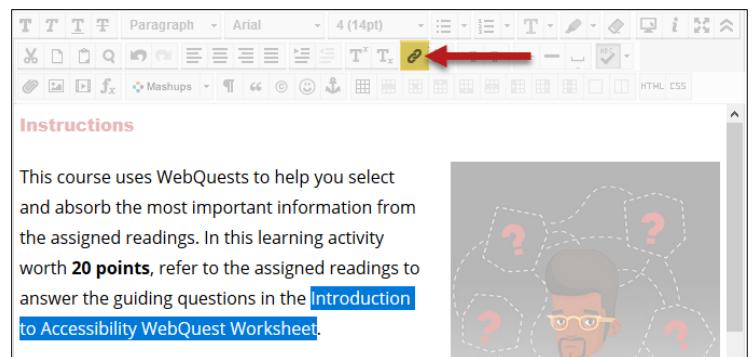

- When you are done, scroll to the bottom of the page and click **SUBMIT**. The link will be added to your content area page like so.

## Using Content Editor Tools to Build a Link

When creating any type of content in Blackboard, the content-editor provides formatting and linking tools.

- In the content editor, type your text content. Then, **HIGHLIGHT** the words that you want to turn into a web link with your mouse. In the content editor, click the **LINK** icon.

- In the **INSERT/EDIT LINK** pop-up window that appears, paste the URL web address in the **LINK PATH** field. In the **TARGET** menu, select **OPEN IN NEW WINDOW**. Then, click the **INSERT** button.

Insert/Edit Link - Mozilla Firefox

General

Link Path: https://goo.gl/forms/uEH3Rwri9KYaGHvs2

Target: Open in New Window (\_blank)

Title: A Google Form

Class: -- Not Set --

Cancel Insert

3. The highlighted text will styled to appear like a link, but will not yet work. Click the **SUBMIT** button to publish your content and test the link.

4. Once published, the link will open the website in a new window when clicked.
