Instructors can add, delete, re-arrange, or edit course content only when “Edit Mode” is turned on in the course. Clicking the “Edit Mode” icon in the top-right corner of the course toggles “Edit Mode” on or off.

When “Edit Mode” is on, tools for adding, deleting, or moving content will be visible to the instructor.

When “Edit Mode” is off, the content editing/managing tools will disappear and the course will visually display to the instructor as the course appears to students.
