

Course Menu Becomes Hidden

Known Issue

Faculty may notice that a Blackboard course's main menu sometimes collapses on the left-side of the screen, giving priority to the course material displayed to the right. This is a feature of Blackboard's responsive web design that occurs when the browser window is **1024 pixels wide or lesser**.

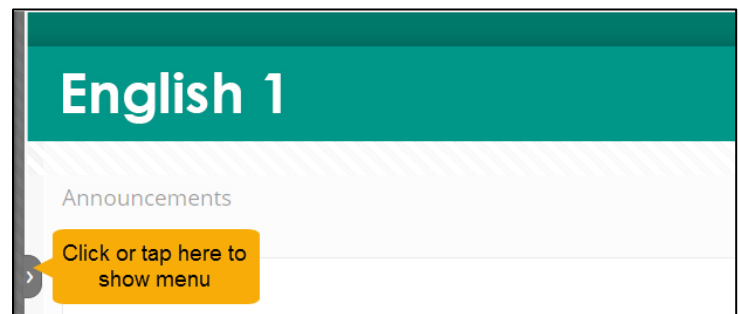

To Stop Course Menu Collapse When Viewing Course on a PC:

Try the following actions when you have opened your web browser:

- In the browser, click the maximize icon to  display pages at full screen width.
- When the browser is open, adjust its [zoom magnification](#) by pushing the CTRL and – keys on the keyboard at the same time. This adjusts the scale of content displayed on the page. Improvement should be seen at 90% zoom magnification.

To Show a Hidden Course Menu

When viewing the course, click on the gray tab on the left-margin of the page.

To Hide a Course Menu

When viewing the course, click on the gray tab to the right of the menu.
