

# Course Menu Becomes Hidden

Known Issue

Instructors and students may notice that a Blackboard course’s main menu sometimes collapses on the left-side of the screen, giving priority to the course material displayed to the right. This is a feature of Blackboard’s responsive web design that occurs when the browser window is **1024 pixels wide or lesser**.

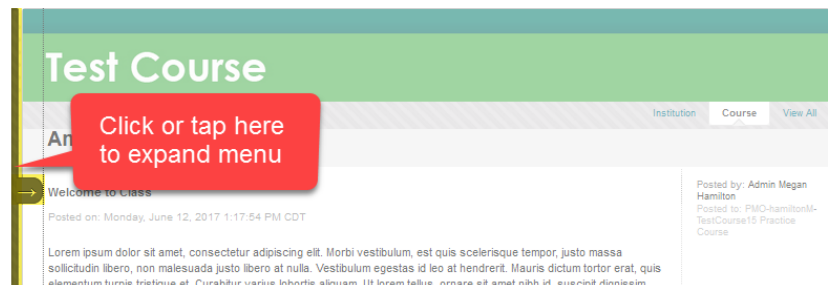

## To Stop the Course Menu from Automatically Collapsing

Try the following actions on your desktop or laptop PC:

- When the browser is open, click the maximize icon  to display pages at full screen width.
- When the browser is open, adjust its [zoom magnification](#) by pushing the CTRL and – keys on the keyboard at the same time. This adjusts the scale of content displayed on the page. Improvement should be seen at 90% zoom magnification.

## To Show a Hidden Course Menu

When viewing the course, click on the highlighted gray region to the left of the page to show a hidden menu.

## To Hide a Course Menu

When viewing the course, click on the highlighted gray region to the right of the menu to hide it.
