

Blackboard Inaccessible in Internet Explorer Version 10 and Lower

Blackboard Known Issue

When attempting to access Blackboard using *Internet Explorer* version 10 or lower, Blackboard's *Login Here* and *Course List* modules will display a warning message stating that "module information is temporarily unavailable". The error occurs because Internet Explorer 10 and lower are outdated browsers that are **no longer compatible** with Blackboard.

Recommended Workaround

Use a supported browser from the following list and use the [Browser Tester](#) to verify that your web browser is correctly configured for use with Blackboard.

Supported Web Browsers

Download Here – Choose Two (2):

Google Chrome 36+

<https://www.google.com/intl/en/chrome/browser/desktop/index.html>

Mozilla Firefox 31+

<https://www.mozilla.org/en-US/firefox/>

Internet Explorer 11+ or Edge

<http://windows.microsoft.com/en-us/windows/downloads>

Safari 6+

<https://support.apple.com/downloads/%2523safari>

*[Internet Explorer's security settings](#) may need to be configured for use with Blackboard.

*Mobile web browsers *are not compatible* with all features of Blackboard. Be prepared to use a desktop or laptop computer.

*All desktop browsers except Firefox and Safari have discontinued support for [Java](#) and [QuickTime](#) plugins (i.e. NPAPI Plugins). Content requiring these media plugins will only be accessible in Firefox or Safari.

For additional support in resolving browser issues, see our guide to [Resolving Common Browser Problems](#).
