Instructors and students using Firefox 39.0 to access Blackboard by typing the url https://blackboard.matc.edu directly in the browser’s address bar may encounter a security connection failure message.

Blackboard Technical support has identified this as a known issue caused by a change in Firefox 39.0’s security protocols and is working on a solution to resolve the error.

Work Around Solution
Until a solution is provided, please try accessing Blackboard through the direct link on the MATC homepage or use an alternate browser, such as Google Chrome or Internet Explorer.
